

(Autonomous & Residential) [Affiliated to Madurai Kamaraj University]

M.Sc. Zoology Degree (Semester) Examinations, November 2017 Part – III : Core Subject : First Semester : Paper – I

#### BIOCHEMISTRY

| BIOCHEMISTRY<br>Under CBCS – Credit 4<br>Time: <b>3</b> Hours | Max. Marks: <b>75</b> |
|---|-----------------------|
| <u>SECTION – A</u>  |                       |
| Answer ALL Questions :  | $(10 \times 2 = 20)$  |
| 1. Define Phospholipids.                                      |                       |
| 2. Define isoenzymes.   |                       |
| 3. Comment on glycolysis.                                     |                       |
| 4. Comment on Deamination.                                    |                       |
| 5. Define Transdeamination.                                   |                       |
| 6. Comment on Omega3.   |                       |
| 7. Mention the Glutamate family of aminoacids.                |                       |
| 8. Comment on Z-DNA.  |                       |
| 9. Define Polysaccharides.                                    |                       |
| 10. Comment on Vitamin A.                                     |                       |
| <u>SECTION – B</u>  |                       |

#### **Answer ALL Questions :**

 $(5 \times 5 = 25)$ 

11.a) Comment on Vitamin C and D

(**OR**)

b) Write a brief account on the structure of fatty acids.

12. a) Give a brief account on Glycogenesis.

### (OR)

b) Write about the metabolism of Uronic acid.

13. a) Comment on Transmethylation.

#### (OR)

b) Comment on Ornithine Cycle.

14. a) Explain briefly the metabolism of ketone bodies.

# (OR)

b) Comment on Steroid hormones.

15.a) Comment on Purine synthesis.

#### (**OR**)

b) Discuss briefly the various classes of RNA.

# <u>SECTION – C</u>

**Answer any THREE Questions :** 

 $(3 \times 10 = 30)$ 

- 16. Give an account on the metabolic role of hormones.
- 17. Write a detail account on HMP pathway.
- 18. Write about the metabolism of Pyruvate family of aminoacids.
- 19. Give an account on metabolism of Cholesterol.
- 20. Explain the biosynthesis of Pyrimidine.

(Autonomous & Residential) [Affiliated to Madurai Kamaraj University]

**M.Sc. Zoology** Degree (Semester) Examinations, November 2017 Part – III : Core Subject : First Semester : Paper – II

#### **CELL AND MOLECULAR BIOLOGY**

Under CBCS – Credit 4

Time: 3 Hours

Max. Marks: **75** 

 $(10 \times 2 = 20)$ 

# <u>SECTION – A</u>

#### **Answer ALL Questions:**

- 1. Give the unit membrane concept.
- 2. What are ETP particles?
- 3. Brief the signal hypothesis.
- 4. Show the importance of autophagy.
- 5. Bring out the phases of cell cycle.
- 6. Enlist the components of mitotic apparatus.
- 7. Write a note on RFLP.
- 8. Comment of deciphering the code.
- 9. What is splicing mechanism?
- 10. Why regulatory genes are significant?

# <u>SECTION – B</u>

#### **Answer ALL Questions:**

 $(5 \times 5 = 25)$ 

11.a) What is intercellular communication and add a note on its various types?

#### (OR)

b) Elucidate the mechanism of oxidative phosphorylation.

12. a) How the proteins are transported by Golgi complex?

#### (**OR**)

- b) Classify the lysosomal enzymes.
- 13. a) In detail give the molecular organisation of a chromosome.

#### (OR)

- b) Define cancer and discuss its causes.
- 14. a) Analyze the denaturation of DNA.

## (OR)

- b) Prove the replication of DNA with reference to meselson and stahl experiment.
- 15.a) Bring out the steps involved in initiation of polypeptide chain.

#### (OR)

b) Examine the Lac operation in E. Coli.

# <u>SECTION – C</u>

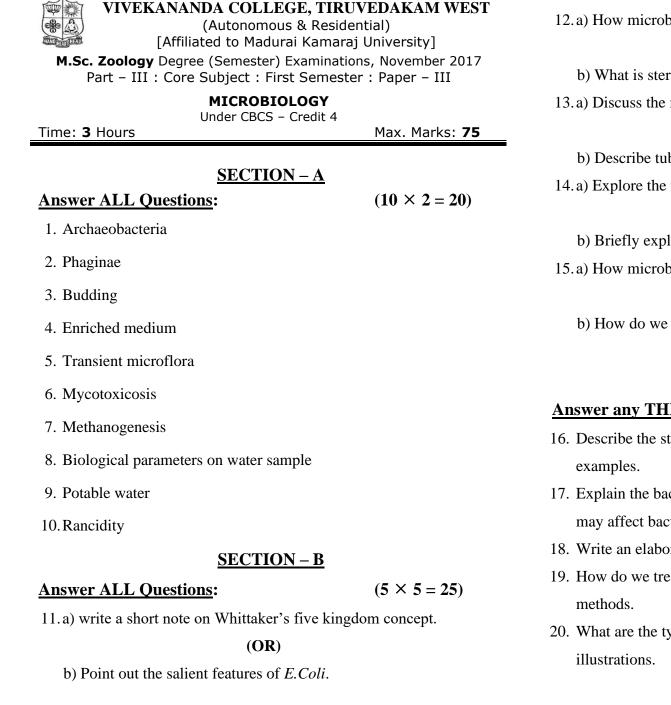

**Answer any THREE Questions:** 

 $(3 \times 10 = 30)$ 

16. Oxidation of pyruvic acid to carbon dioxide and water takes place

by Kreb's cycle – Justify.

- 17. Highlight the structure and types of endoplasmic reticulum.
- 18. Evaluate the cell aging.
- 19. Enzymes play a major role in replication Substantiate.
- 20. Elaborate the gene regulation in eukaryotes.

12. a) How microbes are classified based on their mode of nutrition?

#### (**OR**)

b) What is sterilization? Add a note on heat sterilization.

13.a) Discuss the mode of transmission of diseases.

### $(\mathbf{OR})$

- b) Describe tuberculosis and its control measures.
- 14. a) Explore the microorganisms in aquatic environment.

## (**OR**)

b) Briefly explain phosphorous cycle.

15.a) How microbes can be stored?

#### (**OR**)

b) How do we prevent the food infection and poisoning?

# **SECTION – C**

### **Answer any THREE Questions:**

 $(3 \times 10 = 30)$ 

- 16. Describe the structure and several features of algae with suitable
- 17. Explain the bacterial growth curve and add a note on factors that may affect bacterial growth?
- 18. Write an elaborate note on poliomyelitis and its precaution methods.
- 19. How do we treat the sewage/Industrial effluent? Explain the
- 20. What are the types of fermentation? Explain them with neat

(Autonomous & Residential) [Affiliated to Madurai Kamaraj University]

M.Sc. Zoology Degree (Semester) Examinations, November 2017 Part – III : Core Subject : First Semester : Paper –I

#### BIOINFORMATICS

| Under CBCS – Credit 5<br>Time: <b>3</b> Hours  | Max. Marks: <b>75</b> |  |  |
|--|-----------------------|--|--|
| <u>SECTION – A</u>                             |                       |  |  |
| Answer ALL Questions:                          | $(10 \times 2 = 20)$  |  |  |
| 1. Central processing unit (CPU)               |                       |  |  |
| 2. Super computer                              |                       |  |  |
| 3. TCP/IP – protocol.                          |                       |  |  |
| 4. HTML.                                       |                       |  |  |
| 5. Biological database.                        |                       |  |  |
| 6. Gen bank.                                   |                       |  |  |
| 7. BLAST.                                      |                       |  |  |
| 8. Multiple Sequence Alignment.                |                       |  |  |
| 9. Ramachandran plot                           |                       |  |  |
| 10. Proteomics.                                |                       |  |  |
| <u>SECTION – B</u>                             |                       |  |  |
| Answer ALL Questions:                          | $(5 \times 5 = 25)$   |  |  |
| 11.a) Enumerate the applications of MS Office. |                       |  |  |

- (**OR**)
- b) What are the components of a computer and comment.

12. a) Enumerate the steps involved in the creation of a web page using

# HTML. (OR)

- b) Differentiate Internet and Intranet with its application.
- 13.a) Write a note on primary DNA databases.

#### (**OR**)

- b) Write a note on the application of bioinformatics.
- 14. a) Explain pair wise sequence alignment.

#### (**OR**)

- b) Comment on the scoring matrices PAM and BLOSUM.
- 15.a) Explain any two protein secondary structure prediction methods.

#### (OR)

b) Explain how the predicted structure of a protein is validated.

# $\underline{SECTION - C}$

**Answer any THREE Questions:** 

 $(3 \times 10 = 30)$ 

- 16. Explain how computers are being classified.
- 17. Discuss about a) e-mail.

b) Computer Virus

- 18. Describe the types of protein sequence databases.
- 19. Explain gene prediction tools.
- 20. Explain the steps involved in protein structure prediction.

(Autonomous & Residential) [Affiliated to Madurai Kamaraj University]

**M.Sc. Zoology** Degree (Semester) Examinations, November 2017 Part – III : Core Subject : Third Semester : Paper – I

#### **GENETICS** Under CBCS – Credit 4

Time: 3 Hours

Max. Marks: **75** 

 $(10 \times 2 = 20)$ 

# $\underline{SECTION-A}$

### **Answer ALL Questions:**

- 1. State Classical gene concept.
- 2. Define restriction map
- 3. Classify plasmids on the basis of function.
- 4. What are the characteristics of ideal plasmid vector.
- 5. How can early and late genes of phage be distinguished.
- 6. Comment on lytic cycle of  $\lambda$  phage.
- 7. What is frame shift mutation?
- 8. Differentiate deletion mutation from insertion mutation.
- 9. Bring out the euthenics measures for the improvement of existing human race.
- 10. What is HGP?

# <u>SECTION – B</u>

# **Answer ALL Questions:**

 $(5 \times 5 = 25)$ 

11.a) Discuss the fine structure of gene as revealed through the work of r11 locus in T<sub>4</sub> Bacteriophage.

(OR)

b) Trace the steps involved in the construction of chromosome map.

12. a) Schematically represent various steps involved in the isolation of plasmid.

### (OR)

- b) Briefly explain the mechanism of chromosomal transfer between Hfr and F<sup>-</sup> bacteria.
- 13. a) Give an account of transposable elements.

### (OR)

- b) Describe the structure of  $\lambda$  DNA
- 14.a) Consider tautomeric shift as an aspect of transition mutation.

# (OR)

- b) Distinguish white house model from Holiday model involving heteroduplex DNA for recombination.
- 15. a) Summarize positive and negative Eugenic measures.

#### (OR)

b) Highlight any 10 symbols used in pedigree analysis

# <u>SECTION – C</u>

### **Answer any THREE Questions:**

 $(3 \times 10 = 30)$ 

- 16. Examine in detail the techniques available for the isolation of genes.
- 17. Give an illustrative account of bacterial transformation.
- 18. Analyse specialized and generalized transduction.
- 19. Elucidate the mechanisms of DNA repair.
- 20. Write an essay on genetic basis of human Cancer.

(Autonomous & Residential) [Affiliated to Madurai Kamaraj University]

**M.Sc. Zoology** Degree (Semester) Examinations, November 2017 Part – III : Core Subject : Third Semester : Paper – II

### PHYSIOLOGY

| Under CBCS – Credit 4<br>Time: <b>3</b> Hours | Max. Marks: <b>75</b> |
|---|-----------------------|
| <u>SECTION – A</u>                            |                       |
| Answer ALL Questions:                         | $(10 \times 2 = 20)$  |
| 1. Mention the applications of heat therapy.  |                       |
| 2. Define bioelectricity.                     |                       |
| 3. What is Osmosis?                           |                       |
| 4. Define pulmonary ventilation.              |                       |
| 5. Define Muscle Contraction.                 |                       |
| 6. What are Neurotransmitters?                |                       |
| 7. Define Buoyancy.                           |                       |
| 8. Define Neuron.                             |                       |
| 9. Define Cardiac rhythams.                   |                       |
| 10. Comment on Blood flow.                    |                       |
| SECTION – B                                   |                       |

12. a) Define Cardiac cycle.

#### (**OR**)

b) Briefly explain the counter current mechanism.

13. a) Comment on systemic circulation.

#### (**OR**)

b) Define blood pressure.

14. a) Define inter neurons.

# (**OR**)

b) Write short notes on reflex action.

15. a) Write about the importance of electrolytes.

#### (**OR**)

b) Explain about the hydrostatic pressure.

# $\underline{SECTION - C}$

Answer any THREE Questions:  $(3 \times 10 = 30)$ 

- 16. Give an account on haemo-dynamics.
- 17. Describe the organization of Nervous system.
- 18. Write about the physiology of receptors.
- 19. Discuss in detail about body fluids.
- 20. Write about the invertebrate hormone of reproduction.

#### \*\*\*\*

# <u>SECTION – B</u>

 $(5 \times 5 = 25)$ 

# **Answer ALL Questions:**

11.a) Comment on mega voltage therapy. (OR)

b) Comment on Physiotherapy.

(Autonomous & Residential) [Affiliated to Madurai Kamaraj University]

**M.Sc. Zoology** Degree (Semester) Examinations, November 2017 Part – III : Core Subject : Third Semester : Paper – III

#### **PRINCIPLES OF BIOTECHNOLOGY**

Under CBCS – Credit 4

Time: 3 Hours

Max. Marks: 75

 $(10 \times 2 = 20)$ 

# <u>SECTION – A</u>

## <u>Answer ALL Questions</u> :

1. Comment on the term patent.

- 2. Comment on the ethical issues of biotechnology.
- 3. Specify any two applications of DNA ligases.
- 4. Differentiate exo nuclease form endo nuclease in their action.
- 5. Distinguish between  $T_i$  Plasmid and R Plasmid.
- 6. Comment on the term selective markers.
- 7. Comment on RFLP.
- 8. Specify the applications of Microarray.
- 9. Highlight the importance of genomic library.
- 10. Enlist any two of advantages of gene cloning.

# <u>SECTION – B</u>

# **Answer ALL Questions :**

 $(5 \times 5 = 25)$ 

- 11.a) Give an account on bio safety measures in DNA research activity. (OR)
  - b) Describe the social and ethical issues in using of GMO.

12. a) Analyze the mode of action of DNA ligases.

# (OR)

- b) Discuss about list of DNA modifying enzymes.
- 13.a) Evaluate the different steps involved in identification of r DNA.

## (OR)

- b) Expound the types of viral vectors in human gene therapy.
- 14. a) Describe the protocol for restriction mapping.

# (OR)

- b) Summarize the procedure of southern blotting techniques to indentify recombinants.
- 15.a) Explain how gene is transferred into host by electroporation method.

## (**OR**)

b) Write principle and applications of colony hybridization.

# <u>SECTION – C</u>

# **Answer any THREE Questions :**

 $(3 \times 10 = 30)$ 

- 16. Summarize scope and present status of biotechnology.
- 17. Critically analyse mode of action and advantages of restriction enzymes.
- 18. Enlist the different Cloning and expression vectors with cited example.
- 19. Critically examine procedure for DNA sequencing.
- 20. Discuss the procedure for construction of cDNA library.

|   |                       | 2        |
|   |                       |          |

# **SECTION – B**

### **Answer ALL Questions:**

 $(5 \times 5 = 25)$ 

11.a) Explain briefly the Soil profile.

### $(\mathbf{OR})$

- b) What are Vaccines? Write a brief note on Immunization schedule for Children.
- 12. a) What is SCP? Mention the uses of Single Cell Protein. (OR)

# b) Describe a Fermenter tank with a diagram.

13.a) Write an account on Directed gene sequencing method.  $(\mathbf{OR})$ 

#### b) Describe the possible dangers of Genetically engineered organisms.

- 14.a) Describe the Biotechnology behind production of Human growth hormones.  $(\mathbf{OR})$ 
  - b) Write a brief account of Live-stock management.
- 15.a) Discuss the biohazards of rDNA technology.

### $(\mathbf{OR})$

b) Write a brief account on Colony Hybridization Technique.

# **SECTION – C**

#### Answer any THREE Questions: $(3 \times 10 = 30)$

- 6. Give an account on the Renewable and non-renewable energy resources.
- 17. Write an account on the Importance and Methods of Water Conservation.
- 8.Describe the Method of Plant tissue culture and its significances.
- 19. Explain the Methods of Embryo transfer technique with neat diagram.

20. Write an account on Gene Therapy.
