VIVEKANANDA COLLEGE

College with Potential for Excellence

Residential & Autonomous – A Gurukula Institute of Life-Training
Re-accredited (3rd Cycle) with 'A' Grade (CGPA 3.59 out of 4.00) by NAAC
Affiliated to Madurai Kamaraj University
(Managed by Sri Ramakrishna Tapovanam, Tirupparaitturai, Trichy)
TIRUVEDAKAM WEST, MADURAI DISTRICT– 625 234

Choice Based Credit System

&

Outcome Based Education (OBE) Curriculum Framework

(Outcome Based Education Curriculum Framework

Vision

To raise a battalion of Mathematics graduates equipped with logical thinking and tender heart to serve our motherland as potential leaders in the manifold of national effort.

Mission

Enriching the mental, emotional and intellectual facets of mathematics students to cope up with any career that they choose and to strive to attain perfection in life.

About the Programme

Mathematics was taught as a subject in Pre–university classes from 1971 onwards – that was the year the college started functioning. Mathematics as an Ancillary subject was offered from the inception of B.Sc. Physics degree that is from the year 1973-74. From 1980-81 onwards B.Sc Degree in Mathematics major was offered and so Mathematics department became a full-fledged one. The college became autonomous in June 1987. So the department had freedom to chart its own course. Syllabus was framed in 1987 and updated periodically to cater to the career needs of the students. But while framing and updating the syllabus, Mathematics department has always kept in mind the main stake holders are rural students. So, fundamental Mathematics was always a part of the syllabus. When the need arose Computer oriented papers, Competitive mathematics, Operations research, Vedic mathematics, Value education, Environmental science etc. were also incorporated in the syllabus.

The department also did not fall back in repaying its social obligations. Our students, guided by the department teachers, become resource persons to teach mathematical concepts, Vedic maths, yoga etc. to the school students. Learning becomes easier by laboratory activities and by building mathematical models. Our student's practice this and their innovations are exhibited and explained in the three day Mathematics Exhibition for Rural Masses conducted once in 2 years. Our students are encouraged to participate enthusiastically in all the college endeavors and activities like NSS, NCC, controlling the public during functions and festival times, election duties, temple cleanliness etc.

Programme Educational Objectives (PEOs)

The objectives of this programme is to

PEO 1: Apply and advance the knowledge and skills acquired, to become a creative professional in their chosen field.

PEO 2: Discuss the multidisciplinary knowledge through industrial visit and providing a sustainable competitive edge in meeting the industry needs.

PEO 3: Perceive to become an eminent Mathematician with Excellent Employability and Research Skill.

PEO 4: Develop confidence to appear for Competitive examinations and will occupy higher posts in administrative level.

PEO 5: Expose them to various contemporary issues which will enable them to become ethical and responsible towards themselves, co-workers, the Society and the Nation.

Programme Outcomes (POs)

The Objective of this Programme is to

PO 1: Provide a thorough Disciplinary Knowledge and Critical Thinking

PO 2: Offer Effective Communication and Digital Literacy

PO 3: Demonstrate a Social Interaction

PO 4: Utilize Effective Citizenship

PO 5: Apply Ethics and Values

PO 6: Provide Environment and Sustainability

PO 7: Make use of Self –directed and life – long learning

Programme Specific Outcomes (PSOs)

PSO1: Demonstrate basic manipulative and calculative skills in Trigonometry, geometry and Calculus.

PSO2: Read, analyzes and judge the validity of mathematical arguments.

PSO3: Students will be able to communicate mathematical ideas both orally and in writing.

PSO4: Display mastery of basic computational skills and recognize the appropriate use of technology to enhance those skills.

PSO5: Investigate and apply mathematical models in a variety of contexts related to science, technology, business and industry.

Graduates Attributes(GA)

GA 1: To acquire the knowledge to apply analytical and theoretical skills to model and solve mathematical problems.

GA 2: To provide sufficient knowledge on computer skills through MS office, C, C++ and many innovative and modern subjects in Mathematics

GA 3: To apply the critical thinking ability to carry out extended investigation and innovation of mathematical formulations.

GA 4: To recognize connections between different branches of mathematics and appreciate the connections between theory and applications.

GA 5: To understand and apply mathematical concepts in various contexts related to science, technology, business, and industry.

Under Graduate Programmes - Question Paper Pattern for Both CIA & End Semester Examinations

With Effect From: 2018-19 onwards

Part I (Tamil / Sanskrit/Hindi) and Part II English

OBE Syllabus UG:
Section A – Remembering (K1)
Section B – Remembering (K1)
Section C – Understanding (K2)
Section D – Applying (K3)

CIA Test Question Paper Pattern (UG) – 3 Tests per Semester – 2 Hours
Section - A: MCQs (Compulsory)   10 X 1 =10 Marks
Section - B: VSA (5 out of 7)   5 X 2 = 10 Marks
Section - C: SA (3 out of 5)   3 X 6 = 18 Marks
Section - D: LA (1 out of 2)   1 X 12 =12 Marks

                Total   50 Marks

End Semester Examinations Question Paper Pattern (UG) – 3 Hours
Section - A: MCQs   10 X 1 =10 Marks**(From Question Bank given by the Course Teacher)**
Section - B: VSA (5 out of 7)   5 X 2 =10 Marks
Section - C: SA (Either-or)   5 X 5 = 25 Marks
Section - D: LA (3 out of 5)   3 X 10 =30 Marks

                Total   75 Marks

Part III (Core, Allied &Elective)

CIA Test Question Paper Pattern (UG) – 3 Tests per Semester – 2 Hours
Section - A: MCQs (Compulsory)   10 X 1=10 Marks
Section - B: VSA (5 out of 7)   5 X 2 = 10 Marks
Section - C: SA (3 out of 5)   3 X 6 = 18 Marks
Section - D: LA (1 out of 2)   1 X 12=12 Marks

                Total   50 Marks

End Semester Examinations Question Paper Pattern (UG) – 3 Hours
Section - A: MCQs   10 X 1 =10 Marks**(From Question Bank given by the Course Teacher)**
Section - B: VSA (5 out of 7)   5 X 2 =10 Marks
Section - C: SA (Either-or)   5 X 5= 25 Marks
Section - D: LA (3 out of 5)   3 X 10 =30 Marks

                Total   75 Marks

CIA Test Question Paper Pattern (UG) – 3 Tests per Semester at Department Level– 1 Hour

Section - A: MCQs	5 X 1 = 5Marks
Section - B: VSA (2 out of 4)	2 X 2 = 4 Marks
Section - C: SA (1 out of 2)	1 X 6 = 6 Marks
Section - D: LA (1 out of 2)	1 X 10=10 Marks

Total   25 Marks

For competitive exam questions Pattern (OMR with 4 options will be used) 50X1=50 (**1 hour**)

End Semester Examinations Question Paper Pattern (UG) – 2 Hours

Section - A: MCQs	10 X 1 = 10 Marks**(From Question Bank given by the Course Teacher)**
Section - B: VSA (5 out of 7)	5 X 2 = 10 Marks
Section - C: SA (Either-or)	3 X 9 = 27 Marks
Section - D: LA (2 out of 4)	2 X 14= 28 Marks

Total   75 Marks

For competitive exam questions Pattern (OMR with 4 options will be used) 75X1=75 (**2 hours**)

CIA Test Question Paper Pattern (UG) – 1 Test per Semester – 2 Hours

Section - A: MCQs	10 X 1 = 10 Marks
Section -B: VSA (5 out of 7)	5 X 2 = 10 Marks
Section - C: SA (3 out of 5)	3 X 6 = 18 Marks
Section - D: LA (1 out of 2)	1 X 12= 12 Marks

Total   50 Marks

End Semester Examinations Question Paper Pattern (UG) – 2 Hours

Section - A: MCQs	10 X 1 = 10 Marks**(From Question Bank given by the Course Teacher)**
Section - B: VSA (5 out of 7)	5 X 2 = 10 Marks
Section - C: SA (Either-or)	3 X 9 = 27 Marks
Section - D: LA (2 out of 4)	2 X 14= 28 Marks

Total   75 Marks

EXTENSION ACTIVITIES
End Semester Examinations Question Paper Pattern (UG) – 2 Hours

Section - A: MCQs	10 X 1 = 10 Marks
Section - B: VSA (5 out of 7)	5 X 2 = 10 Marks
Section - C: SA (Either-or)	3 X 9 = 27 Marks
Section - D: LA (2 out of 4)	2 X 14= 28 Marks

Total   75 Marks
----

1. General Knowledge – (One Examination per Semester– UG & PG) – 1 Hour

    Section – A: MCQs   50 X 1 =50 Marks (**OMR Sheet**)

                    Total   **50** Marks

                                       ----

2. Wit for Wisdom and Humour for Health – (One Examination per Year – UG & PG) – 1 Hour

    Section – A: LA (5 out of 7)   5 X 20= 100 Marks

                    Total   **100** Marks

                                      ----

3. Spiritual Education– (One Examination per Year – UG & PG) – 1 Hour

    Section – A: VSA   20 X 2= 40 Marks

    Section – B: SA (3 out of 5)   3 X 5 = 15 Marks

    Section –C: LA (2 out of 4)   2 X 10 =20 Marks

                    Total   **75** Marks

                                 ----

4. Physical Training– (One Examination for III Year UG & II Year PG Students) – 1 Hour

    Section - A: MCQs   10 X 1 = 10 Marks

    Section – B: SA ((Either-or))   4 X 5 = 20 Marks

    Section – C: LA (2 out of 4)   2 X 10 =20 Marks

                Total   **50** Marks

Continuous Internal Assessment (CIA) - Distribution of Marks

	UG		PG	
Part - I, II Part - III	Test (Best Two)	15 Marks	Test (Best Two)	15 Marks

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Core Theory		SEMESTER - I
Course Title : **Algebra and Trigonometry**		
Course Code: **05CT11**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble
This course is offered for the I B.Sc. Mathematics students to provide a strong foundation on the concepts in Algebra and Trigonometry.

Course Outcomes (COs)
On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts and get the knowledge about irrational and imaginary roots and transformations of equations.	K_1
CO 2	understand the basic concepts of reciprocal equations	K_2
CO 3	find the approximate roots using Horner's method	K_2, K_3
CO 4	derive the expansions of $\sin\theta$, $\cos\theta$, $\tan\theta$, $\sin n\theta$, $\cos n\theta$, $\tan n\theta$, $\sin^n\theta$, $\cos^n\theta$.	K_2, K_3
CO 5	understand the concept of the logarithm of complex numbers and to find the sum of trigonometric series using C+iS method summation of series.	K_3

K1-Remebering **K₂-Understanding** **K₃-Applying**

Syllabus

	Algebra	
UNIT-I	Irrational roots, imaginary roots- relation between roots and coefficients- symmetric functions of the roots- sum of the powers of roots – Newton's theorem(without proof) - transformations of equations – roots with signs changed – roots multiplied by a given number.	**(15Hrs)**
UNIT-II	Reciprocal equations – synthetic division - decreasing and increasing the roots- removal of terms – to form an equation whose roots are any power of the roots – transformations in general.	**(15Hrs)**
UNIT- III	Descarte's rule of signs – Rolle's theorem – multiple roots – finding approximate roots using Horner's method.	**(15Hrs)**

	Trigonometry	
UNIT- IV	Expansions – expansions of $\cos n\theta$, $\sin n\theta$, $\tan n\theta$ -expansions for $\cos^n\theta$ and $\sin^n\theta$ – expansions of $\sin\theta$, $\cos\theta$, and $\tan\theta$ in series of ascending powers of θ – hyperbolic functions-inverse hyperbolic functions.	**(15Hrs)**
UNIT- V	Logarithm of complex numbers – summation of series : (C+iS method only)	**(15Hrs)**

Text Books

1. Algebra Vol. 1 by T.K.Manicavachagampillai, T. Natarajan, K S Ganapathy, Viswanathan printers and publishers pvt. Ltd., Chennai – Edition 2004.
2. Trigonometry by T.K.Manicavachagampillai, Viswanathan printers and publishers pvt. Ltd., Chennai – Edition 2004.

Unit	Text Book	Chapters
1		6 (1-15(15.1-15.2))
2	1	6 (16-21)
3		6 (24-26, 30)
4	2	III (1-5) & IV (1, 2.0 – 2.3)
5		V (5.0 - 5.2) & VI (3.0 - 3.2)

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III **: Core Theory**		SEMESTER **- I**
Course Title **: DIFFERENTIAL CALCULUS**		
Course Code: **05CT12**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To enable the students to

- Have a thorough knowledge of differentiation.
- Solve the problems using expansion of functions
- Know about curvature, radius of curvature and evolute.
- Gain knowledge about the application of Differential Calculus at higher level.
- Acquire the basic skill to solve problems on differential calculus and concept of differential equation.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts and definitions of differentiation and explain the method of differentiation	K_1, K_2
CO 2	get knowledge of successive differentiation and Leibnitz theorem.	K_2, K_3
CO 3	understand the concept of subtangent and subnormal which are important in physics and also the concept of envelope, a curve that is tangential to each one of a family of curves in a plane.	K_2, K_3
CO 4	get the knowledge of radius of curvature ,which shows how a curve is almost part of a circle in a local region	K_2
CO 5	understand the concept of partial derivatives which are used in vector calculus and differential geometry.	K_1, K_2, K_3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

	Differentiation	
UNIT-I	Methods of differentiation: standard forms – differential coefficients of x^n, e^x, logx, sinx, cosx, tanx, (derivations not included). Differential coefficient of a sum or difference – product rule – quotient rule – function of a function rule – inverse functions – hyperbolic functions, inverse hyperbolic functions – logarithmic differentiation – trigonometrical transformations– differentiation of implicit function- differentiation of one function w.r.t. another function.	**(15 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

	Successive Differentiation	
UNIT-II	Successive differentiation –the nth derivative – standard results – formation of equation involving derivatives –Leibnitz formula for the nth derivative of a product and related problems	**(16 Hrs)**
UNIT- III	**Subtangent, Subnormal & Envelope** Subtangent and subnormal – differential coefficient of the length of an arc of a curve – polar coordinates – angle between the radius vector and the tangent – angle of intersection of two curves – length of an arc in polar co-ordinates – envelope - method of finding the envelopes	**(16 Hrs)**
UNIT- IV	**Curvature of plane curves** Curvature –radius, centre, circle and chord of curvature – Cartesian formula for the radius of curvature – the coordinates of centre of curvature-evolute and involute – radius of curvature when the curve is given in polar co-ordinates – pedal equation of a curve.	**(16 Hrs)**
UNIT- V	**Partial differentiation** Partial differentiation –function of a function rule- total differential coefficient- implicit functions –homogeneous functions	**(12 Hrs)**

Text Book

CALCULUS vol I by T.K.Manikavasakam Pillai & S.NarayananVishwanathan printers and publishers Pvt Ltd. Chennai – Reprint 2017.

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III **: Allied Theory**		SEMESTER **- I**
Course Title **: ALLIED PHYSICS – I**		
Course Code: **06AT01**	Hours per week: 4	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To enable the students to

- It deals with the concept of principles of wave motion
- Gives an idea about Elasticity, viscosity and surface tension
- It discusses the study of thermal physics
- Apply the concept of electricity
- Providing good foundation in optics

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	explain the basic concepts of acoustic studies	K_2
CO 2	understand the properties of matter like elasticity, viscosity and surface tension	K_2
CO 3	outline theory of laws of thermodynamics	K_2, K_3
CO 4	understand the basic concept of electricity and magnetism	K_2
CO 5	apply the methodology of optical activities.	K_3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	**Waves and Oscillations** Simple Harmonic Motion – Composition of two Simple Harmonic Motions in a straight line- Composition of two Simple Harmonic Motions of equal time periods at right angles- - Melde's Experiment – Ultrasonics- production –application and uses- – Reverberation – Absorption coefficient - Acoustics of buildings – factors affecting the acoustics of buildings- Sound distribution in an auditorium	**(12 Hrs)**
UNIT-II	**Properties of Matter** **Elasticity:** Introduction- Different moduli of elasticity – Poisson's ratio-Energy stored in a stretched wire - Bending of beams – expression for the bending moment- Theory of Non-uniform bending – Torsion Pendulum – expression for the period of oscillation of a torsion pendulum. **Viscosity:** Streamline flow and turbulent flow – Coefficient of	**(12 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

	viscosity - Derivation of Poiseulle's formula. **Surface Tension:** Introduction- experimental determination of surface tension – Jaegar's method.	
UNIT- III	**Thermal Physics** Laws of thermodynamics – Zeroth law of thermodynamics – first law of thermodynamics - second law of thermodynamics- third law of thermodynamics – Heat engine – Entropy – Change of entropy in a carnots cycle.	**(12 Hrs)**
UNIT- IV	**Electricity and Magnetism** Introduction – Magnetic effect of electric current – Oersted's experiment –BiotSavart law- Magnetic induction at a point on the axis of a circular coil- choke coil-Electric circuit – switches- fuses- circuit breaker – the relay	**(12 Hrs)**
UNIT- V	**Geometrical Optics** Introduction – image formation by refraction – Critical angle –Refraction through prism – direct vision spectroscope – coma – Spherical aberration in a lens – methods of minimizing spherical aberration – condition for minimum spherical aberration of two thin lenses separated by a distance - chromatic aberration in a lens- condition for achromatism of two lenses separated by a distance	**(12 Hrs)**

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – IV : **Non Major Elective**	SEMESTER **- I**
Course Title **: Fundamentals of Mathematics**	
Course Code: **05NE11**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble
To enable the students to

- Have a thorough knowledge of Ratio & Proportion.
- Solve the problems in equation of lines.
- Know about matrices, addition & Multiplication in matrices.
- Gain knowledge about arithmetic series & Geometric series.
- Solve the problems in quadratic equations.

Syllabus
Unit-I

Theory of indices – Ratio and Proportion.

Unit-II

Distance between two points – Equation of a line – Different forms [except normal form].

Unit-III

Theory of Matrices – Addition, multiplication of two matrices.

Unit-IV

Finding the nth term and sum to n terms of an A.P and G.P – Arithmetic mean and geometric mean.

Unit-V

Solving the quadratic equations – finding the roots – forming the equation when the roots are given (only second degree).

Text Books
1. Business Mathematics by Dr.V.R.Vittal, Margham publications, Chennai (Reprint 2012).
2. A text Book of Business Mathematics by Padmalochan Hazarika, S. Chand publication (Reprint 2014).

Unit	Text Books	Chapters
1	1	Chapter 4,2
2		Chapter 12
3		Chapter 14
4		Chapter 7
5	2	Chapter 3 (3.2)

Reference Book
Business mathematics by Dr.M.Manoharan & Dr.C.Elango Palani Paramount publications, Palani.2006 Edt.

PART – III **: Core Theory**		SEMESTER **- II**
Course Title **: Integral Calculus**		
Course Code: **05CT21**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the I B.Sc. Mathematics students to provide a strong foundation on the concepts in Integral Calculus and to develop the skill of solving problems.

Course Outcomes (CO)

Upon successful completion of this course, the students will able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	recall the integration of algebraic, rational, trigonometrical, exponential and logarithmic functions	K_1
CO 2	recognize the integration as the reverse process of differentiation	K_2
CO 3	compute the definite and indefinite integrals by using the techniques of integration	K_2, K_3
CO 4	use the knowledge of multiple integrals for finding the volume and area	K_2, K_3
CO 5	use the integration to solve real world problems.	K_3

K1-Remebering   **K₂-Understanding**   **K₃-Applying**

Syllabus

UNIT-I	Integration – Introduction – standard forms – methods of integration – integral of function containing linear function of x – integrals of the form $\int F[(f(x)]f'(x)dx$-integration of rational & irrational algebraic functions.	**(15Hrs)**
UNIT-II	Properties of definite integrals – integration by parts – reduction formulae for integrands $x^n e^{ax}$, $x^n \cos ax$, $\sin^n x$, $\cos^n x$, $\sin^m x \cos^n x$, $\tan^n x$, $\cot^n x$, $\sec^n x$, $\csc^n x$.	**(15Hrs)**
UNIT- III	Double integral – evaluation of double integral – double integral in polar coordinates – Beta and Gamma functions.	**(15Hrs)**
UNIT- IV	Triple integrals – change of variables – Jacobean – transformation from Cartesian to polar coordinates – Cartesian to spherical polar coordinates – Cartesian to cylindrical coordinates – area by double integral – volume by triple integral.	**(15Hrs)**
UNIT- V	Fourier series – definition – even and odd functions – expanding f(x) as Fourier series in (-π,π), (0,2π) – half range series – development of cosine and sine series – change of interval – expanding f(x) as Fourier series in (-l,l), (0,2l) and (0,l)	**(15Hrs)**

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : **Core Theory**		SEMESTER - **II**
Course Title **: ANALYTICAL GEOMETRY 3D AND VECTOR CALCULUS**		
Course Code: **05CT22**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To enable the students to acquire the basic knowledge in the three dimensional Analytical Geometry and Vector Calculus.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts of coordinate system and planes. Equation of a straight line. Equation of a sphere. Basic concepts of vector differentiation and vector integration	K_1, K_2
CO 2	know about the relation between the direction ratios and direction cosines of a line, different forms of the equation of a plane, equation of a straight line and equation of a sphere.	K_2, K_3
CO 3	find the angle between two planes, angle between a line and a plane, shortest distance between two lines and circle of intersection of two spheres.	K_2, K_3
CO 4	know about divergence and curl of a vector, solenoidal and irrotational vectors, Laplacian operator.	K_2
CO 5	get the knowledge of Green's theorem, Stoke's theorem and Gauss divergence theorem and application these theorems.	K_2, K_3

K1-Remebering   **K$_2$-Understand**   **K$_3$-Apply**

Syllabus

UNIT-I	**Coordinate System and Planes** Coordinate system and planes **-** rectangular Cartesian coordinates - direction cosines – direction ratios – angle between 2 lines-condition for parallelism and perpendicularity- planes – equation of a plane - different forms – general form, three point form, intercept form, normal form-angle between two planes – length of the perpendicular from a point to a plane- angle bisectors of two planes.	**(17 Hrs)**
UNIT-II	**The Straight Line** Straight line - equation of a straight line-different forms – non-symmetric form, symmetric form, two point form – a plane and a line-coplanar lines-condition for coplanarity- angle between a line and a plane - equation of a plane containing two lines – length of the perpendicular from a point to a	**(17 Hrs)**

	line - skew lines – shortest distance between two skew lines.	
UNIT- III	**Sphere** The Sphere - equation of a sphere – different forms – centre radius form, diameter form- tangent line and tangent plane – angle of intersection of two spheres-section of a sphere.	**(12 Hrs)**
UNIT- IV	**Vector Differentiation** Vector differentiation – differentiation of vectors – gradient of vectors – geometrical interpretation – directional derivative and its maximum value – divergence and curl of a vector – solenoidal and irrotational vectors – Laplacian operator – harmonic vectors – connected theorems and problems.	**(14 Hrs)**
UNIT- V	**Line and Surface integrals** Vector integration – line integrals – work done by a force – surface integrals – integral theorems – Green's theorem in plane , Stoke's theorem, Gauss divergence theorem (statement of theorems only) – simple problems.	**(15 Hrs)**

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Allied Theory		SEMESTER - II
Course Title : **ALLIED PHYSICS – II**		
Course Code: **06AT02**	Hours per week: 4	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To enable the students to

- learn the basic concepts of Physical Optics
- understand the fundamental concepts of Atomic Physics
- learn the basics of Nuclear Physics and its applications
- learn the principles of relativity
- understand fundamentals of analogue and digital electronics

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	differentiate various wave phenomenon of light such as interference, diffraction and polarization	K_1, K_2
CO 2	understand the concept of spin and implication in classification of elements	K_2
CO 3	distinguish between Nuclear Fission and Fusion and their applications	K_1, K_2, K_3
CO 4	understand the significance of Lorentz transformation and Mass energy equivalence	K_2
CO 5	distinguish between Junction Diode and Zener Diode and explain various logic gates	K_3

K1-Remebering **K₂-Understanding** **K₃-Applying**

Syllabus

UNIT-I	**PHYSICAL OPTICS**	**(12 Hrs)**
	Interference – Introduction – interference in thin films – production of colors in thin films – diffraction – introduction – plane transmission diffraction grating – polarization – introduction – double refraction – specific rotator power - lauret's half shade polarimeter – difference between interference and diffraction.	
UNIT-II	**ATOMIC PHYSICS**	**(12 Hrs)**
	Vector atom model – Quantum numbers associated with the vector atom model – the Pauli's exclusion principle – magnetic dipole moment due to spin – the stern and gerlach experiment.	

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

UNIT- III	**NUCLEAR PHYSICS**	**(12 Hrs)**
	Models of nuclear structure – mass defect – binding energy – ionization chamber - nuclear fission-energy released in fission- atom bomb – Nuclear reactor – Nuclear fusion – Distinction between fission and fusion.	
UNIT- IV	**ELEMENTS OF RELATIVITY**	**(12 Hrs)**
	Frame of reference - Galilean Transformation Equations – Postulates of Special theory of Relativity – The Lorentz Transformation Equations - derivation – Length Contraction – Time Dilation –Mass Energy Equivalence	
UNIT- V	**ELECTRONICS**	**(12 Hrs)**
	Light Emitting Diode (LED) – Zener Diode- experiment to study the characteristics of the zener diode – zener diode as voltage regulator – Logic Gates – AND gate – OR gate- the NOT gate – the NAND gate –NAND gate is a universal gate- the NOR gate –NOR gate is universal gate – Boolean algebra – Postulates and theorem of Boolean algebra - De Morgan's theorem.

Course Title **: ALLIED PHYSICS PRACTICAL**		
Course Code: **06AP03**	Hours per week: 2	Credits: 2
CIA : 40 Marks	ESE : 60 Marks	Total : 100 Marks

Preamble

To enable the students to
- Develop practical skills in mechanical, electrical measurements and optics experiments.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	estimate the value of Young's modulus of a given iron bar, wooden scale and the value of Rigidity modulus of a given wire	K3
CO 2	estimate the viscosity of a given liquid	K3
CO 3	measure the thickness of thin paper and radius of curvature of a convex lens	K3
CO 4	determine the refractive index a glass prism and wavelength of the prominent lines of the mercury spectrum	K3
CO 5	draw I-V characteristics of a diode and Zener diode	K3

K1-Remebering   **K$_2$-Understanding**   **K$_3$-Applying**

Syllabus

	1	Non-Uniform Bending – Pin and Microscope
	2	Uniform Bending – Pin and Microscope
	3	Non-Uniform Bending – Optic lever
	4	Uniform Bending – Optic lever
	5	Compound Pendulum
	6	Torsional Pendulum
	7	Sonometer – Verification of Laws (1st law & 2nd law)
	8	Viscosity by Stoke's method
	9	Newton's rings – Determination of Radius of curvature
	10	Air wedge – Thickness of a wire
	11	Spectrometer – Refractive Index
	12	Spectrometer – Grating -Normal incidence
	13	Carey Foster Bridge
	14	Diode Characteristics & Zener Diode Characteristics
	15	Logic Gates – AND, OR, NOT

Course Title : **Differential Equations**	
Course Code: **05CT31**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the II B.Sc. Mathematics students to provide a strong foundation on the concepts in Differential Equations.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts and get the knowledge about the differential equations of first order. Also study the different types of methods to solve the differential equations of first order.	K1
CO 2	derive the solutions of the differential equations of higher order with constant coefficients and with variable coefficients.	K_2
CO 3	study the different types of methods to solve the linear differential equations.	K_2, K_3
CO 4	understand the concept of the Laplace transformations, inverse Laplace transformations. Also to solve the differential equations using Laplace transformations.	K_2, K_3
CO 5	understand the basic concepts and get the knowledge about the partial differential equations. Also study the different types of methods to solve the partial differential equations.	K_1, K_3

K1-Remebering   **K₂-Understanding**   **K₃-Applying**

Syllabus

UNIT-I	Differential equations of first order – formation of differential equations – homogeneous equations – non homogeneous equations – linear equations – Bernoulli's equations – exact equations.	**(15 Hrs)**
UNIT-II	Linear differential equations with constant coefficients – particular integrals of functions of the form e^{ax}, cos ax, sin ax, x^m, $e^{ax}V$ – equations with variable coefficients-equations reducible to the linear homogenous equations.	**(15 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

UNIT- III	Variation of parameters – simultaneous differential equations – simultaneous equations with constant coefficients – total differential equations.	**(15 Hrs)**
UNIT- IV	Laplace transformations – the inverse Laplace transformations – solving differential equations using Laplace transformations.	**(15 Hrs)**
UNIT- V	Partial differential equations – derivation of partial differential equations – different integrals of partial differential equations – solutions of partial differential equations in some simple cases – standard types of partial differential equations – standard I, II, III, IV – Lagrange's equations.	**(15 Hrs)**

Text Book

Calculus – vol III, by S. Narayanan, T.K.Manicavachagam Pillay, S.Viswanathan (printers & publishers) Pvt. Ltd (Reprint 2017).

Unit	Chapters
1	Chapter 1 (Section: 1-3)
2	Chapter 2 (Section: 1-4 & 8 - 9)
3	Chapter 2 (Section: 10) and 3
4	Chapter 5
5	Chapter 4 (Section: 1-6)

Reference Book

Differential equations, by Dr.S.Arumugam, New Gamma Publishing House, Palayamkottai.

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)

(For those students admitted during the Academic Year 2018-19 and after)

PART – III **: Core Theory**		SEMESTER **- III**
Course Title **: Numerical Methods**		
Course Code: **05CT32**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the II B.Sc. Mathematics students to provide a strong foundation on the concepts in Numerical Methods.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts Algebraic and transcendental equations and solve the equations using different types of methods.	K1
CO 2	understand the concept of finite differences and interpolation and understand the different types of interpolation formulae.	K_2
CO 3	understand the concept of Numerical differentiation and apply it in different types of formulae.	K_2, K_3
CO 4	understand the concept of Numerical Integration and apply it in formula like Newton's cote's formula, trapezoidal rule and Simpson's rules	K_2, K_3
CO 5	study the basic concept of Numerical solution of differential equations, to solve the differential equation by different types of numerical methods.	K_1, K_3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	Algebraic and transcendental equations: errors in numerical computation- iteration method – Aitken's Δ^2 method – bisection method –Regula falsi method – Newton-Raphson method – simultaneous equations – back substitutions – Gauss' elimination method – Gauss-Jordan elimination method – calculation of inverse of a matrix – Gauss-Jacobi iteration method – Gauss-Seidal iteration method.	**(15 Hrs)**
UNIT-II	Finite differences and interpolation – difference operators – other difference operators – difference equations – formation of difference equations – linear difference equations – Newton's interpolation formula – central difference interpolation formula – Lagrange's interpolation formula – divided differences – divided difference interpolation formula – inverse interpolation.	**(15 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

UNIT- III	Numerical differentiation – derivatives using Newton's forward, backward and central difference interpolation formulae – Stirling's formula – maxima and minima of the interpolating polynomial.	**(15 Hrs)**
UNIT- IV	Numerical integration – Newton-Cote's quadrature formula – trapezoidal rule – Simpson's one-third rule – Simpson's three-eighth rule – Weddley's rule.	**(15 Hrs)**
UNIT- V	Numerical solution of differential equations – Taylor's series method – Picard's method – Euler's method – Runge_Kutta methods – predictor-corrector formulae.	**(15 Hrs)**

PART – III **: Allied Theory**		SEMESTER **- III**
Course Title **: Programming in C**		
Course Code: **05AT31**	Hours per week: 4	Credits: 3
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the II B.Sc. Mathematics students to provide the strong foundation on concepts Programming in C

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts of Character set & C tokens.	K1
CO 2	understand the basic concepts of decision making and branching	K_2
CO 3	understand the basic concepts of arrays ie.,one, two and multi-dimensional arrays.	K_2, K_3
CO 4	understand the basic concepts of user defined function.	K_2
CO 5	understand the basic concepts of pointers and accessing address of a variable.	K_1, K_2

K1-Remebering   **K₂-Understanding**   **K₃-Applying**

Syllabus

UNIT-I	Character set- C tokens- Keywords and identifiers-constants-variables-data types-declaration of variables-assigning values to variables-defining assignment-increment, decrement and logical operators-arithmetic expressions-type conversion-managing input/output operations	**(12 Hrs)**
UNIT-II	Decision making and branching - 'if' statement (all forms) -'switch' statement - '*goto'* statement – loops - '*while'*, 'do', 'for' statements - jumps in loops	**(12 Hrs)**
UNIT- III	Arrays-one, two and multi-dimensional array-string handling-reading, writing, comparison and concatenation of strings-table of strings	**(12 Hrs)**
UNIT- IV	User defined function-categories of functions-handling non-integer functions-functions with arrays-structures and unions- structure initialization-comparison of structure variables-array of structure –array within structures-structures within structures – structures and function-unions	**(12 Hrs)**
UNIT- V	Pointers-accessing address of a variable- Pointer expressions- Pointers and scale factors- Pointers in arrays, string, function and structure- files- opening and closing a file-input/output operations on file-random access to files	**(12 Hrs)**

Unit	Chapters
1	Chapter 2 (2.1 – 2.11) & 3 (3.1 – 3.14)
2	Chapter 5 (5.1 – 5.9) & 6 (6.1 – 6.5)
3	Chapter 7 (7.1 – 7.7) & 8 (8.1 – 8.9)
4	Chapter 9 (9.9 – 9.17 except 9.16) & 10 (10.1 – 10.12 except 10.6,10.7)
5	Chapter 11 (11.3,11.6,11.8 – 11.16) & 12 (12.1 – 12.6 except 12.5)

PART – III **: Allied Practical**		SEMESTER **- III**
Course Title **: Practical Programming in C**		
Course Code: **05AP32**	Hours per week: 2	Credits: 2
CIA : 40 Marks	ESE: 60 Marks	Total : 100 Marks

Preamble

This course is offered for the II B.Sc. Mathematics students to provide the strong foundation to write programs in Programming in C.

List of Problems for Lab Programming in C: Practical

1. Program to calculate the area of a triangle.
2. Program to find whether the given number is odd or even using 'if…else…' statement.
3. Program to find the biggest among three given numbers using 'nested if' statement.
4. Program to sum the digits of a given number.
5. Program to reverse a number using 'while' loop.
6. Program to check whether the given number is prime or not using 'for' loop.
7. Program to prepare students mark statement.
8. Program to sum the series $(1+2+3+\ldots.. + n)$
9. Program to sum the series $(1/1+1/2+1/3+\ldots.+1/n)$
10. Program to generate Fibonacci series.
11. Program to sort an array in ascending order using one dimensional array.
12. Program to sort an array in descending order using one dimensional array.
13. Program to add two matrices using two dimensional arrays.
14. Program to multiply two matrices using two dimensional arrays.
15. Program to calculate the factorial value of a number using recursive function

Programming in ANSI C by E.Balagurusamy, Tata Mc. Graw Hill Publishing Company Ltd, New Delhi – First reprint 2019.

Reference Book

Schaum's Outline Series: programming with C by Byron Gottfried (second Edition), Tata Mc. Graw Hill Publishing Company Ltd, New Delhi.

DEPARTMENT OF MATHEMATICS

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)

(For those students admitted during the Academic Year 2018-19 and after)

PART – IV : Skill Based Theory	SEMESTER - III	
Course Title : **Mathematical Logic**		
Course Code: **05SB31**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total : 100 Marks

Preamble

To develop the knowledge in logics.

Syllabus

UNIT I

Introduction – statements and notations – connectives

UNIT II

Statement formulae – well-formed formulae

UNIT III

Tautology

UNIT IV

Equivalence of formula – truth table method – replacement process

UNIT V

Law of duality – tautological implications

PART – III : **Core Theory**		SEMESTER - **IV**
Course Title : **Sequences and Series**		
Course Code: **05CT41**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the II B.Sc. Mathematics students to provide a strong foundation on the concepts in Sequences and Series.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts of sequence, inequalities. Also study the basic theorems and results.	K1
CO 2	derive the different types of sequences.	K_2
CO 3	study the theorems and results on sequences.	K_2, K_3
CO 4	understand the basic concept of Series and different types of tests.	K_2, K_3
CO 5	study the different types of convergent series and also study the power series.	K_1, K_3

K1-Remebering   K₂-Understand   K₃-Apply

Syllabus

UNIT-I	Intervals in R – bounded sets – least upper bound and greatest lower bound of sets – bounded functions – triangle inequalities – arithmetic, geometric and harmonic means – Cauchy-Schwarz inequality – Weierstrass' inequality – theorems only (no problems).	**(15 Hrs)**
UNIT-II	Sequences – bounded, monotonic, convergent, oscillatory, divergent sequences – algebra of limits – behavior of monotonic sequences.	**(15 Hrs)**
UNIT- III	Cauchy's first limit theorem – Ceasaro's theorem – Cauchy's second limit theorem – subsequences – limit points – Cauchy sequences (upper and lower limit of a sequence not included).	**(15 Hrs)**
UNIT- IV	Series of positive terms – convergence – Cauchy's general principle of convergence – comparison test, Kumar's test, D-Alembert's ratio test, Gauss' test, Cauchy's root test, Rape's test, Cauchy's condensation test (proofs of tests not included) – simple problems.	**(15 Hrs)**
UNIT- V	Alternating series – absolute convergence and conditional convergence – Dirichlet test – rearrangement of series – multiplication of series – power series.	**(15 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : **Core Theory**	SEMESTER - IV
Course Title : **Dynamics**	
Course Code: **05CT42**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the II B.Sc. Mathematics students to provide a strong foundation on the concepts in Dynamics.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	study the basic concepts path, range, height and time of flight of the projectile.	K1
CO 2	study the concepts of Collision of elastic bodies and loss of kinetic energy.	K_2
CO 3	study the concepts of Simple Harmonic Motion (S.H.M) and simple pendulum. Also using these to find the composition of two S.H.M .	K_2, K_3
CO 4	understand the concept of Central Orbits and find the velocity, acceleration and pedal equations.	K_2, K_3
CO 5	study the concept of Moment of inertia and find the Moment of inertia of different objects.	K_1, K_3

K1-Remembering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	Projectiles – path of the projectile, range, etc. – velocity of the projectile in magnitude and direction at the end of time t – range on an inclined plane – enveloping parabola.	**(15 Hrs)**
UNIT-II	Collision of elastic bodies – fundamental laws of impact – impact of a smooth sphere on a fixed smooth plane – direct impact of two smooth spheres – oblique impact of two smooth spheres – loss of kinetic energy due to direct and oblique impact of two smooth spheres.	**(15 Hrs)**
UNIT- III	Simple Harmonic Motion – solution of S.H.M equation – geometrical representation of S.H.M – composition of two simple harmonic motions. Simple pendulum – equivalent simple pendulum – seconds pendulum.	**(15 Hrs)**
UNIT- IV	Central orbits – velocity and acceleration in polar coordinates – differential equation of a central orbit – pedal equation of a central orbit – pedal equations of some well-known curves –	**(15 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

	velocities in central orbits.	
UNIT- V	Moment of inertia – theorems on parallel and perpendicular axes – moments of inertia in some particular cases – Dr. Routh's rule.	**(15 Hrs)**

PART – III : **Allied Theory**		SEMESTER **- IV**
Course Title **: Programming in C++**		
Course Code: **05AT41**	Hours per week: 4	Credits: 3
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the II B.Sc Mathematics students to provide the strong foundation on concepts Programming in C ++

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts of object Oriented programming (OOP).	K1
CO 2	understand the basic concepts of functions in C++.	K_2
CO 3	understand the basic concepts of classes and objects, specifying a class and defining member function.	K_2, K_3
CO 4	understand the basic concepts ofConstructors and destructors.	K_2
CO 5	understand the basic concepts of inheritance and defining derived classes.	K_1, K_2

K1-Remebering **K₂-Understanding** **K₃-Applying**

Syllabus

UNIT-I	Basic concept of object Oriented programming (OOP)- benefits of oop-application of OOP- operators in C++	**(9 Hrs)**
UNIT-II	Functions in C++-the main function –function prototyping-call by reference-return by reference- inline function – default arguments – constant arguments – function overloading – friend and virtual function – math library function	**(9 Hrs)**
UNIT- III	Classes and objects – specifying a class – defining member function – static data members – static member function-array of objects-friendly functions- returning objects	**(9 Hrs)**
UNIT- IV:	Constructors and destructors – Constructors –parameterized Constructors-multiple Constructors in a class- Constructors with default arguments- dynamic initialization of objects – copy Constructor –dynamic Constructors Constructing two-dimensional arrays – constant objects – destructors – operators overloading.	**(9 Hrs)**
UNIT- V:	Inheritance – defining derived classes – single inheritance – multilevel inheritance – hierarchical inheritance – hybrid inheritance – virtual base classes – abstract classes – constructors in derived classes	**(9 Hrs)**

Text Book

Object Oriented programming with C++ by E.Balagurusamy fourth Edition Tata Mc. Graw Hill Publishing Company Ltd, New Delhi – reprint 2016.

Unit	Chapters
1	Chapter 1 (1.5 – 1.8)
2	Chapter 4 (4.1 – 4.12)
3	Chapter 5 (5.3, 5.4, 5.11 – 5.13, 5.15, 5.16)
4	Chapter 6 (6.1 – 6.11) & 7 (7.1 – 7.5)
5	Chapter 8 (8.1 – 8.11 except 8.4)

Reference Book

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III **: Allied Practical**		SEMESTER **- IV**
Course Title **: Practical Programming in C++**		
Course Code: **05AP42**	Hours per week: 2	Credits: 2
CIA : 40 Marks	ESE : 60 Marks	Total : 100 Marks

Preamble

This course is offered for the II B.Sc Mathematics students to provide the strong foundation to write programs in C ++.

List of Problems for Lab Object Oriented Programming with C++: practical

1. Program to convert Fahrenheit into Celsius.
2. Program to swap two numbers without third variable.
3. Program to find whether the given year is leap or not using 'if…else…' statement.
4. Program to find the commission of sales using 'simple if' statement.
5. Program to print odd numbers up to a range using 'while' loop.
6. Program to find the factorial of a given number using 'for' loop.
7. Program to generate Fibonacci series using 'do…while' loop.
8. Program to generate the pyramid of digits.
9. Program to check whether the given number is a perfect number or not.
10. Program to calculate nCr value using 'function'.
11. Program to explain 'function overloading'.
12. Program to find the sum of three numbers using 'class'.
13. Program to perform various arithmetic operations using 'member functions' inside the 'class'.
14. Program to display the basic details of a person using 'class'.
15. Program to explain 'static data members' of 'a class'.

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – IV **: Skill Based Theory**		SEMESTER **- IV**
Course Title **: Competitive Mathematics**		
Course Code: **05SB41**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble
To develop the skills of solving problems in competitive exams.

Syllabus
UNIT I:
>   HCF and LCM of numbers – decimal fractions.

UNIT II:
>   Square roots and cube roots – averages.

UNIT III:
>   Problems on ages – percentage.

UNIT IV:
>   Profit and loss – ratio and proportion.

UNIT V:
>   Partnership.

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : **Core Theory**		SEMESTER - V
Course Title **: STATISTICS**		
Course Code: **05CT51**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III B.Sc. Mathematics students to provide a strong foundation on the concepts in Statistics.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basic concepts of standard deviation, moments, skewness, correlation and regression line. And also study the basic theorems.	K_1, K_2
CO 2	understand the concept of Probability, random variables and Boole's inequality.	K_2
CO 3	understand the concepts in some special distributions and its applications.	K_2, K_3
CO 4	illustrate sampling and Testing of Hypothesis & apply the t-test, f-test.	K_2, K_3
CO 5	apply Chi-square test for population variance and goodness of fit.	K_2, K_3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	Measures of dispersion – Moments – Skewness – kurtosis- Correlation – Karl Pearson's coefficient of correlation – rank correlation – regression lines – properties of regression coefficients.	**(15Hrs)**
UNIT-II	Probability and random variables **–** probability set function – addition theorem on probability – conditional probability – independent events – Boole's inequality – random variables – discrete and continuous random variables – mathematical expectation – moment generating functions – characteristic functions.	**(15Hrs)**
UNIT- III	Binomial, Poisson and Normal distributions – moment generating function – mean, mode, standard deviation – recurrence relation for central moment – addition property – fitting of the distribution – area property of normal distribution – limiting cases.	**(15Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

UNIT- IV	Sampling - Sampling distributions - Testing of hypothesis – Tests of significance (small samples) – tests of significance based on t-test, F-test.	(15Hrs)
UNIT- V	Tests of significance based on χ^2 - distribution–Chi-square test for population variance – goodness of fit – independence of attributes.	(15Hrs)

Text Book

Statistics by Dr. S. Arumugam and Prof. A. Thangapandi Isaac, (Reprint 2013) New Gamma Publishing House, Palayamkottai.

Unit	Chapters
1	Chapter 3, 4, 6 (Section:6.1-6.3)
2	Chapter 11,12
3	Chapter 13
4	Chapter 14 (14.1 -14.3) &15 (15.1,15.2)
5	Chapter 16

Reference Book

Mathematical Statistics by J.N. Kapur and H.S. Saxena, S.Chand & Company Pvt. Ltd, New Delhi.

(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Core Theory		SEMESTER - V
Course Title : **MODERN ALGEBRA**		
Course Code: **05CT52**	Hours per week: 5	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III year students to provide the strong foundation on concepts Modern Algebra

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the Relations and Mappings	K1
CO 2	understand the groups and its properties	K_2
CO 3	apply the properties of a group in the Order of an element	K_2, K_3
CO 4	understand the Isomorphism and apply it in theorems	K_2
CO 5	understand the elementary properties of Rings and ideals	K_2, K_3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	Relations and Mappings	**(15 Hrs)**
UNIT-II	Definition of groups – examples – elementary – properties - permutation groups - subgroups.	**(15 Hrs)**
UNIT- III	Order of an element - Cosets and Lagrange's theorem - normal sub groups - quotient groups.	**(15 Hrs)**
UNIT- IV	Isomorphism and homomorphism of groups	**(15 Hrs)**
UNIT- V	Rings – definition - elementary properties – isomorphism - types of rings - characteristics of ring - subrings and ideals - quotient rings - maximal and prime ideals	**(15 Hrs)**

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Core Theory		SEMESTER - V
Course Title : **REAL ANALYSIS**		
Course Code: **05CT53**	Hours per week: 5	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble
To enable the students to acquire the basic knowledge in pure analysis.

Course Outcomes (CO)
On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the concepts of sets and its properties of elements.	K_1
CO 2	obtain the concepts of Open & Closed sets and its properties.	K_2
CO 3	develop the concepts about the metric on sets, spaces and functions.	K_2, K_3
CO 4	examine the concepts of metric on connected spaces and its applications.	K_2, K_3
CO 5	evaluate the concepts on compact metric spaces and its applications.	K_2, K_3

K1-Remebering   **K₂-Understanding**   **K₃-Applying**

Syllabus

UNIT-I	Countable sets – uncountable sets – inequalities of Holder and Minkowski. Metric spaces – definition and examples – bounded sets in a metric space – open ball in a metric space – open sets.	**(15 Hrs)**
UNIT-II	Sub spaces – interior of a set – closed sets – closure – limit point – dense sets.	**(15 Hrs)**
UNIT- III	Complete metric space – Baire's category theorem – continuity – homeomorphism – uniform continuity.	**(15 Hrs)**
UNIT- IV	Connectedness – definition and examples – connected subsets of R – connectedness and continuity.	**(15 Hrs)**
UNIT- V	Compactness – compact space – compact subsets of R – equivalent characterization for compactness – compactness and continuity.	**(15 Hrs)**

Text Book

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Core Theory		SEMESTER - V
Course Title : **STATICS**		
Course Code: **05CT54**	Hours per week: 6	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble
To enable the students to acquire the basic knowledge in Statics.

Course Outcomes (CO)
On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	remember the parallelogram law, triangle law, Lami's theorem and resolved parts.	K_1, K_2
CO 2	explain the concept of like and unlike parallel forces, condition of equilibrium, Varigon's theorem and couples.	K_1, K_2
CO 3	interpret the concept of system of coplanar forces and equation to the line of action of the resultant and apply it to various problems.	K_2, K_3
CO 4	illustrate the concept of Friction, laws of friction and equilibrium of a body and rough inclined plane and apply these concept problems	K_2, K_3
CO 5	understand the concept of equilibrium of strings, equation of common catenary and geometrical properties of catenary, apply it to various problems.	K_2, K_3

K1-Remebering   **K$_2$-Understanding**   **K$_3$-Applying**

Syllabus

UNIT-I	Forces acting at a point – parallelogram law of forces – triangle law of forces – polygon law of forces – Lami's theorem – (λ-μ)– theorem – resolution of forces – components of forces – resolved parts – resultant of any number of forces acting at a point – condition of equilibrium of any number of forces acting at a point.	**(18Hrs)**
UNIT-II	Parallel forces and moments – resultant of two like and unlike parallel forces – conditions of equilibrium of three coplanar parallel forces – moment of a force – geometrical representation of moment – Varignon's theorem – generalized theorem – moment of a force about an axis – couple – equilibrium of two couples – equivalence of two couples – couples in parallel planes – resultant of coplanar couples – resultant of a couple and a force.	**(18Hrs)**
UNIT- III	Equilibrium of three forces acting on a rigid body – conditions of	**(18Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

	equilibrium – two trigonometrical theorems – solving statical problems (simple problems) – coplanar forces – reduction of coplanar forces – conditions for a system of coplanar forces to reduce to a single force or to a couple – equation to the line of action of the resultant – conditions of equilibrium of a system of coplanar forces (simple problems only).	
UNIT- IV	Friction – statical, dynamical and limiting friction – laws of friction – co-efficient of friction – angle of friction – cone of friction – equilibrium of a particle on a rough inclined plane – equilibrium of a body on a rough inclined plane under a force parallel to the plane – equilibrium of a body on a rough inclined plane under any force.	**(18Hrs)**
UNIT- V	Equilibrium of strings – equation of the common catenary – tension at any point – important formulae – geometrical properties of the catenary – approximations – parabolic catenary – suspension bridge.	**(18Hrs)**

PART – III : Elective Theory		SEMESTER - V
Course Title : **LINEAR PROGRAMMING**		
Course Code: **05EP5A**	Hours per week: 5	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To enable the students to acquire the basic knowledge in LINEAR PROGRAMMING.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	gain the basic concepts &ideas of LPP, forming mathematical model and solving LPP by graphically.	K1, K3
CO 2	obtain the optimal solution for more than two variables in LPP by using simplex method.	K2
CO 3	apply dual problem method to reduce the complexity of solving LPP.	K2
CO 4	learn the various methods to solve transportation problem and find feasible & optimal solution.	K3
CO 5	acquire fundamental knowledge and to find the optimal solution for assignment problem and game theory.	K3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	Linear Programming Problem – mathematical formulation of the problem – LPP-graphical solution method – some exceptional cases – general LPP – canonical, standard forms of LPP.	**(15 Hrs)**
UNIT-II	LPP-simplex method – fundamental properties of solutions – the computational procedure – use of artificial variables – two phase method – penalty (Big-M) method.	**(15 Hrs)**
UNIT- III	Duality in linear programming – general primal-dual pair – formulating dual problem – primal-dual pair in matrix form – duality and simplex method.	**(15 Hrs)**
UNIT- IV	Transportation problem (TP) – general transportation problem – the transportation table – duality in transportation table – loops in transportation tables – formulation of the TP – solution of a TP – north west corner method – least cost method – Vogel's approximation method – degeneracy in TP – transportation algorithm (modi method) - unbalanced TP.	**(15 Hrs)**
UNIT- V	Assignment problem – mathematical formulation of the problem – the assignment method – special cases in assignment problems – games and strategies – two person zero-sum games – some basic terms – the maxmin, minmax principle –saddle points – graphic solution –	**(15 Hrs)**

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Elective Theory		SEMESTER - V
Course Title : **Combinatorics**		
Course Code: **05EP5B**	Hours per week: 5	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III B.Sc. Mathematics students to provide a strong foundation on the concepts in Combinatorics.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	relate and apply sum and product rules.	K1, K3
CO 2	analyze and solve problems related to Permutation and Combination.	K3
CO 3	make use of Inclusion-Exclusion Principle to solve problems on generalized permutation and combination	K3
CO 4	demonstrate ordinary and exponential generating functions	K2
CO 5	solve the problems using Recurrence Relations.	K3

K1-Remebering   **K₂-Understanding**   **K₃-Applying**

Syllabus

UNIT-I	The Sum Rule and the Product Rule – The Pigeonhole Principle - Solved Problems on The Sum Rule and the Product Rule - Solved Problems on The Pigeonhole Principle.	**(15Hrs)**
UNIT-II	Permutations and Combinations -Solved Problems on Permutations and Combinations.	**(15Hrs)**
UNIT- III	Generalized Permutations and Combinations –The Inclusion-Exclusion Principle - Solved Problems on Generalized Permutations and Combinations - Solved Problems on The Inclusion- Exclusion Principle - Solved Problems on Generalized Inclusion-Exclusion Principle.	**(15Hrs)**
UNIT- IV	Ordinary and Exponential Generating Functions - Solved Problems on Ordinary Generating Functions -Solved Problems on Exponential Generating Functions.	**(15Hrs)**
UNIT- V	Recurrence Relations- Solved Problems on Recurrence Relations and Associated Generating Functions.	**(15Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

PART – IV : **Skill Based Theory**		SEMESTER **- V**
Course Title **: Quantitative Aptitude**		
Course Code: **05SB51**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To develop the skills of solving problems in Competitive Exams.

Syllabus

Unit-I:

   Time   and work – time and distance

Unit –II:

   Problems on trains

Unit – III:

   Simple interest –compound interest

Unit – IV:

   Logarithms – calendar

Unit – V:

   Clocks – stocks and shares.

Text Books

Quantitative Aptitude for competitive examinations by Dr. R.S.Aggarwal, Tata MC. Graw Hill publication, New Delhi, Reprint 2011.

Units	Chapters
1	Chapter 15 & 17
2	Chapter 18
3	Chapter 21 & 22
4	Chapter 23 & 27
5	Chapter 28 & 29

Reference Books

1. Quickest Mathematics – Sh.S.N.Prasad – Kiran Prabakashan Pvt. Ltd., - edition 2013.

2. Quantitative Aptitude for the CAT – Nighit K.Sinha – Pearson India education Services Pvt. Ltd., - 2017

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – IV : **Common Subject Theory**		SEMESTER - V
Course Title : **Environmental studies**		
Course Code: **ESUG51**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

- Disseminate information of Environment of national and international issues
- Environmental consciousness creation among the students
- Facilitation of environmental leadership among students

Syllabus

Unit-I:

Introduction – Nature, scope and importance of Environmental studies – Natural Resources and conservation – forest, water and energy.

Unit-II:

Ecosystem – concept – structure and function, energy flow, food chain, food web and ecological pyramids

Unit-III:

Biodiversity – definition, types – values – India, a mega diversity zone – Hotspots – Endangered and endemic species – threat to biodiversity and conservation

Unit-IV:

Environmental pollution – Air pollution- causes and effect – Ozone depletion – Global warming – acid rain – Water pollution – Noise pollution – Solid waste management – Nuclear hazard

Unit-V:

Human population and the environment – Population growth – variation among nations – effects of population explosion – family welfare programme – environment and human health.

Text Book

Environment studies by R.Murugesan, 2009 edition, Milleneum Publication., Madurai-16.

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Core Theory		SEMESTER -VI
Course Title : **LINEAR ALGEBRA**		
Course Code: **05CT61**	Hours per week: 5	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III B.Sc. Mathematics students to provide a strong foundation on the concepts in Linear Algebra.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basics concept in vector space and linear transformation.	K_1, K_2
CO 2	understand the inner product space & develop the concepts of vector inner product spaces in orthogonal and orthogonal complement.	K_1, K_3
CO 3	explain the theory of matrices and different types and also apply to solve the inverse of a matrix and rank of a matrix.	K_2, K_3
CO 4	understand the simultaneous linear equation and apply to it in eigen values & eigen vectors.	K_2, K_3
CO 5	illustrate the matrix of a linear transformation and apply the bilinear forms and quadratic forms.	K_2, K_3

K1-Remebering   K$_2$-Understanding   K$_3$-Applying

Syllabus

UNIT-I	Vector spaces – definition and examples – subspaces – linear transformation – span of a set – linear independence – basis and dimension – rank and nullity.	**(15 Hrs)**
UNIT-II	Inner product spaces – definition and examples – orthogonality – orthogonal complement.	**(15 Hrs)**
UNIT- III	Theory of matrices – algebra of matrices – types of matrices – the inverse of a matrix – elementary transformations – rank of a matrix.	**(15 Hrs)**
UNIT- IV	Simultaneous linear equations – characteristic equation – Cayley Hamilton theorem – eigen values and eigen vectors.	**(15 Hrs)**
UNIT- V	Matrix of a linear transformation – relation between multiplication of matrices and the composition of their linear transformations – bilinear forms – quadratic forms.	**(15 Hrs)**

Text Book

Modern Algebra by Dr.S. Arumugam and A. Thangapandi Issac, (Reprint 2018) Scitech Publications, Chennai.

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

Unit	Chapters
1	Chapter 5 (Section: 5.1-5.7)
2	Chapter 6
3	Chapter 7 (Section: 7.1-7.5)
4	Chapter 7 (Section: 7.6-7.8)
5	Chapter 5 (Section: 5.8) & 8

Reference Book

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Core Theory		SEMESTER - VI
Course Title : **COMPLEX ANALYSIS**		
Course Code: **05CT62**	Hours per week: 6	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble
To enable the students to acquire the basic knowledge in complex analysis.

Course Outcomes (CO)
On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the basics in transformations or mappings on complex field among two different fields.	K_1
CO 2	obtain the Cauchy Riemann equations on analytic functions and its applications for some standard theorems.	K_2
CO 3	develop the concepts in Cauchy theorems in complex integrations and its applications.	K_2, K_3
CO 4	analysis the series expansions of different types and the concepts of singularities with its applications.	K_2, K_3
CO 5	evaluate the concepts of residues on analytic functions and the development of contour theorems using residues.	K_2, K_3

    K_1-Remebering   **K_2-Understanding**   **K_3-Applying**

Syllabus

UNIT-I	Elementary transformations – bilinear transformations – cross ratio – fixed points of a bilinear transformation –bilinear transformations which map the real axis onto itself, unit circle onto itself, real axis onto the unit circle.	**(18 Hrs)**
UNIT-II	Cauchy Riemann equations – complex form of C.R. equations – C.R. equations in polar co-ordinates – analytic functions – harmonic functions – Laplace equation –finding conjugate harmonic of an analytic function – Milne-Thompson method.	**(18 Hrs)**
UNIT- III	Complex integration – definite integral – length of a curve – Cauchy's theorem – simply connected and multiply connected regions – Cauchy's integral formula –maximum modulus theorem – higher derivatives – derivative of an analytic function is analytic – Cauchy's inequality – Liouville's theorem – fundamental theorem of algebra – Morera's theorem.	**(18 Hrs)**
UNIT- IV	Series expansions – Taylor's theorem – Taylor's series – Maclaurin's series –Laurent's theorem – Laurent's series – zeros of an analytic function – order of a zero – singular points – isolated singularity – removable singularity – poles – order of a pole-simple pole – double pole – essential singularities.	**(18 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

UNIT- V	Calculus of residues – residues – Cauchy's residue theorem – argument theorem – Rouche's theorem – fundamental theorem of algebra – evaluation of definite integrals – contour integration (problems only).	**(18 Hrs)**

Text Book

Complex Analysis by Dr.S. Arumugam, A. Thangapandi Issac and A.Somasundaram. Scitech Publication, Chennai – Reprint 2017.

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III **: Elective Theory**		SEMESTER **- VI**
Course Title **: GRAPH THEORY**		
Course Code: **05EP6A**	Hours per week: 5	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III B.Sc. Mathematics students to provide a strong foundation on the concepts in Graph Theory.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	remember the basic definitions like Graphs, Sub graphs, Degree of a vertex, Covering and Independent sets	K_1, K_2
CO 2	understand the facts and idea by the Degree sequence, Graphic sequence, connectedness of a graph.	K_1, K_2
CO 3	give the description to the concept of Eulerian and Hamiltonian graphs and apply it to find whether the given graph is Eulerian or Hamiltonian.	K_2, K_3
CO 4	understand the concept of Matching apply it to prove the theorem like Halls marriage theorem.	K_2, K_3
CO 5	classify the concept of Colourability and chromatic number and apply it to solve problems like Four Colour Problem.	K_2, K_3

K1-Remebering   **K₂-Understanding**   **K₃-Applying**

Syllabus

UNIT-I	Graphs and subgraphs – definition and examples – degrees – sub graphs – isomorphism between graphs – Ramsey numbers – independent sets and coverings – intersection graphs and line graphs – matrix of a graph – operations on graphs.	**(15 Hrs)**
UNIT-II	Degree sequences – graphic sequences – connectedness – walks, trails and paths – connectedness and components – blocks – connectivity.	**(15 Hrs)**
UNIT- III	Eulerian graphs – Hamiltonian graphs – trees – characterization of trees – centre of a tree.	**(15 Hrs)**
UNIT- IV	Matchings – matchings in bipartite graphs – planarity – definition and properties – characterization of planar graphs – thickness, crossings and outer planarity.	**(15 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

UNIT- V	Colourability – chromatic number and chromatic index – five colour theorem – four colour problem – chromatic polynomials.	(15 Hrs)

Course Title **: Cryptography**	
Course Code: **05EP6B**	Hours per week: 5	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III B.Sc. Mathematics students to provide a strong foundation on the concepts in Cryptography.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	recall the fundamentals of cryptography	K1
CO 2	demonstrate standard cryptographic algorithms used to analyze confidentiality, integrity and authenticity.	K2,K3
CO 3	list and Identify the security issues in the network, key distribution and management schemes.	K1, K3
CO 4	design encryption techniques to secure data in transit networks.	K3
CO 5	evaluate security mechanisms in theory of networks	K3

K1-Remebering　　　　**K₂-Understanding**　　　　**K₃-Applying**

Syllabus

UNIT-I	Introduction: Security goals – Cryptographic attacks – Services and mechanism –Techniques. Mathematics of Cryptography: Integer arithmetic – Modular arithmetic – Matrices –Linear congruence.	(15Hrs)
UNIT-II	Traditional symmetric – Key ciphers: Introduction – Substitution ciphers-Transposition ciphers – Stream and block ciphers.	(15Hrs)
UNIT- III	Mathematics of symmetric – Key cryptography: Algebraic structures –GF (2^n) Fields Introduction to modern symmetric – Key ciphers: Modern block ciphers – Modern stream ciphers.	(15Hrs)
UNIT- IV	Data Encryption Standard (DES): Introduction – DES structure – DES analysis – Security of DES – Multiple DES (Conventional Encryption Algorithms) – Examples of block ciphers influenced by DES.	(15Hrs)
UNIT- V	Advanced Encryption Standard (AES): Introduction – Transformations – Key expansion – The AES Ciphers – Examples – Analysis of AES.	(15Hrs)

PART – III **: Elective Theory**		SEMESTER **- VI**
Course Title **: OPERATIONS RESEARCH**		
Course Code: **05EP6C**	Hours per week: 6	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III B.Sc. Mathematics students to provide a strong foundation on the concepts in Operation Research.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	remember the fundamental concepts of stock and its types and get more ideas about solving deterministic and probabilistic inventory model.	K1
CO 2	understand the different types queuing systems and its classifications.	K_1 , K_2
CO 3	construct the network diagram and applying network models in diverse simple real life problems.	K_2 , K_3
CO 4	apply Sequencing techniques for processing of jobs by machines in systematic manner.	K_3
CO 5	use the replacement policy methods, to estimate the replacement time when the value of money does not change with time and changes with time.	K_3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	Inventory control – cost associated with inventories – factors affecting inventory control – Economic Order Quantity (EOQ) – deterministic inventory problems with no shortages – probabilistic inventory problems.	**(18 Hrs)**
UNIT-II	Queuing theory – elements of queuing system and characteristics of queuing system – probability distribution in queuing systems – classification of queuing models – Poisson queuing systems (M / M / 1) : (∞ / FIFO), (M / M / 1) : (N / FIFO).	**(18 Hrs)**
UNIT- III	Network scheduling by PERT/CPM – network and basic components – logical sequence – rules of network construction – numbering the events – critical path analysis – probability	**(18 Hrs)**

	consideration in PERT – distinction between PERT and CPM.	
UNIT- IV	Sequencing problems – problem of sequencing – basic terms used in sequencing – processing n jobs through two machines – processing n jobs through k machines – processing two jobs through k machines.	**(18 Hrs)**
UNIT- V	Replacement problem and system reliability – replacement of equipment/asset that deteriorates gradually – replacement policy when the value of money does not change with time – replacement policy when value of money changes with time.	**(18 Hrs)**

Text Book

Operations Research by Kanti Swarup, P.Kapur, Gupta and Man Mohan (19th Edition 2017), Sultan Chand & Sons Publishers, New Delhi.

Unit	Chapters
1	Chapter 19 (Section: 19.1-19.10) and 20 (Section: 20.1-20.2)
2	Chapter 21 (Section: 21.1-21.7, 21.9 (model I&III))
3	Chapter 25 (Section: 25.1-25.8)
4	Chapter 12 (Section: 12.1-12.6)
5	Chapter 18 (Section: 18.1-18.2)

Reference Book

Operations Research by J.K. Sharma, Mac Millan publishers, New Delhi.

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : Elective Theory		SEMESTER - VI
Course Title : **Fuzzy Sets**		
Course Code: **05EP6D**	Hours per week: 6	Credits: 5
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

This course is offered for the III B.Sc. Mathematics students to provide a strong foundation on the concepts in Fuzzy Sets.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	explain the concept of fuzzy sets and crisp sets in brief	K2, K3
CO 2	understand the operations and relations in fuzzy sets	K1
CO 3	demonstrate the operations on fuzzy sets	K2
CO 4	analyze the relationship among fuzzy measures	K3
CO 5	apply fuzzy theory in Engineering, Management and Medicine	K3

K1-Remebering   **K₂-Understanding**   **K₃-Applying**

Syllabus

UNIT-I	Crisp Sets and Fuzzy Sets: Introduction – Crisp Sets: An Overview – The Notion of Fuzzy Sets – Basic Concepts of Fuzzy Sets - Classical Logic: An Overview – Fuzzy Logic.	**(18Hrs)**
UNIT-II	Operations on Fuzzy Sets: General Discussion – Fuzzy Complement – Fuzzy Union – Fuzzy Intersection.	**(18Hrs)**
UNIT- III	Fuzzy Relations: Crisp and Fuzzy Relations – Binary Relations – Binary Relations on a Single Set – Equivalence and Similarity Relations – Compatibility or Tolerance Relations – Orderings.	**(18Hrs)**
UNIT- IV	Fuzzy Measures: General Discussion – Belief and Plausibility Measures – Probability Measures – Possibility and Necessity Measures – Relationship among Classes of Fuzzy Measures.	**(18Hrs)**
UNIT- V	Applications: Engineering - Medicine – Management and Decision Making.	**(18Hrs)**

PART – IV : Skill Based Theory		SEMESTER - VI
Course Title : **Advanced Statistics**		
Course Code: **05SB61**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To develop the skill of solving problems in Advanced Statistics.

Syllabus

Unit – I	Attributes – definition – positive and negative classes – class frequencies – dichotomization
Unit – II	Consistency of data – association of attributes.
Unit – III	Analysis of variance (ANOVA) – introduction – one way classification.
Unit – IV	Two way classification.
Unit – V	Randomized block design and latin square design.

Text Book

Statistics by Dr.S. Arumugam, New Gamma Publishing House (Reprint 2013).

Unit	Chapters
1	Chapter 8 (8.1)
2	Chapter 8 (8.2,8.3)
3	Chapter 17 (17.1)
4	Chapter 17 (17.2)
5	Chapter 17 (17.3)

Reference Book

Mathematical Statistics by Kapur and Gupta.

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – IV : Skill Based Theory		SEMESTER - VI
Course Title : **Boolean Algebra**		
Course Code: **05SB62**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To develop the skill in solving problem of Boolean algebra.

Syllabus

Unit – I:

Relations - reflexive, symmetric, transitive and equivalence relations –anti-symmetric relations – partial order relations – posets – linearly ordered sets – chain.

Unit – II:

Representation of finite posets by diagrams – diagrams for M_5 and N_5 – zero and unit elements in a poset – greatest lower bound and least upper bound.

Unit – III:

Lattice – definition and examples – Idempotent, commutative, associative and absorption laws – sublattices – distributive lattices – modular lattices.

Unit – IV:

Complemented lattices – Boolean algebra – De Morgan's laws – homomorphisms – kernel of a homomorphism – isomorphisms – ideal of a Boolean algebra.

Unit – V:

Definition of a Boolean algebra B (+, *, ', 0, 1) – Boolean algebra of bits – subalgebra – principles of duality – bounded and involution laws – diagrams for D_{70} and D_{210} – atoms – representation theorem.

Text Books

1. Modern Algebra by Dr. S. Arumugam and others (Reprint 2018).
2. Discrete Mathematics by Seymour Lipschutz, Mark Lipson, (3rd Edition) Schaum series

Unit	Text Book	Chapter/Sections
1	1	Chapter 2 (Section: 2.1-2.3)
2		Chapter 9 (Section 9.1)
3		Chapter 9 (Section 9.2-9.4)
4		Chapter 9 (Section 9.5)
	2	Chapter 15 (Section 15.4)
5		Chapter 15 (Section 15.2,15.3,15.6)

Reference Book

Discrete Mathematics by N.CH. S.N. Iyengar, V.M. Chandrasekar, K.A.Venkatesh, P.S.Arunachalam, Vikas publishing Home P.Ltd.

DEPARTMENT OF MATHEMATICS

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – IV : **Skill Based Practical**		SEMESTER – **VI**
Course Title : **SPSS-Statistical package for the Social Sciences (Practical)**		
Course Code: **05SB63**	Hours per week: 2	Credits: 2
CIA: 40 Marks	ESE: 60 Marks	Total: 100 Marks

Syllabus

UNIT-I	Introduction of Data- Individual- Discrete and Continuous Frequency distribution - Bar Diagram- Histogram and Pie Diagram.
UNIT-II	Introduction – Measures of Central tendency : Mean, Median, Mode, Skewness and Kurtosis - Measures of Deviation- Standard Deviation and Coefficient of Variation
UNIT- III	Introduction - Correlation Coefficient - Regression Lines
UNIT- IV	Introduction –Small sample test : T test and F test – Large sample test: Z test and Non parametric test: Chi square test
UNIT- V	Introduction – One way Anova – Two Way Anova

Practical List:

1. Construct Discrete and Continuous Frequency Tables from raw data.
2. Construct Bar Diagram, Multiple Bar Diagram.
3. Construct Histogram and Pie Diagram.
4. Measure Mean, Median, Mode, Skewness and Kurtosis
5. Estimate Standard deviation and Coefficient of variation
6. Estimate Correlation Coefficient
7. Draw and find Regression Lines.
8. Test of Significance t test
9. Test of Significance F test
10. Test of Significance Z test
11. Test of Significance Non parametric test- Chi square test
12. Test of Significance of One way and Two way Anova

Text Book

Statistics by Dr. S. Arumugam and Prof. A. Thangapandi Isaac, New Gamma Publishing House, Palayamkottai. [Chapter 6,11,12,13,14 (14.1 – 14.3),15 & 16]

Reference Book

Mathematical Statistics by J.N. Kapur and H.S. Saxena, S.Chand & Company Pvt. Ltd, New Delhi.

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – IV : Common Subject Theory		SEMESTER - VI
Course Title : **Value Education**		
Course Code: **VEUG61**	Hours per week: 2	Credits: 2
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Syllabus

UNIT I: The heart of Education:

Introduction – Eternal Value – Integrated approach to value education - one for all and all for one – Responsibilities of a citizen – Habit Vs wisdom – purifying mind pollution – Respect for all Religions – Parents, teachers and fellow students – The need and benefit of exercise and meditation for students.

UNIT II: The Value of Body and Life Energy

Introduction – what are the causes for paid, Disease and death? Three Basic needs for all living Beings – Personal Hygiene Five Factors of Balance in Life – The need and benefits of physical Exercise – The value and Base of Life energy – The value and Base of Bio-magnetism - You are your own best caretaker. The Marvelous nature of mind Introduction- Bio-magnetism – The base of the mind – characterization of the Genetic Centre – metal frequency – practice for a creative mind - benefits of meditation.

UNIT III: Analysis of Thought

Introduction – An Exploitation on the nature of thought– six roots for thoughts – Introspection for analysis of thoughts-practical techniques for analysis of thoughts. Benefits of Blessings Effects of good vibrations – Make Blessing a Daily Habit.

UNIT IV: Moralization of Derive

Introduction – moralization of desire - Analyze your desires – Summary of practice Neutralization of Anger: Introduction – meaning – characteristics of Anger – Anger is a Destructive emotion – Anger spoils our relationship with others – Some common misconception about anger – will power and method success through awareness – method of neutralization of anger.

UNIT V: Eradication of Worries

Worry is a mental disease – Nature's Law of cause and effect – factors beyond our control – How to deal with problems – analyze your problem and eradicate worry –Harmonious Relationships Introduction – Three angles of life – The value of harmony in personal relations – Love and Compassion – pleasant face and loving words – appreciation and gratitude to parents and teachers – Bringing needed reforms in educational institutions – Why should we serve others? Brotherhood – A scientific Basis for Universal Brotherhood protection of the environment – non-violence and the fivefold moral culture.

Text Book

Value Education for Health, Happiness and Harmony(Based on the Philosophy and Teachings of Swami Vethanthiri Maharisi) Published By: Brain Trust, Aliyar - A Wing of World Community Service Centre.

Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – V : Common Subject Theory		SEMESTER - VI
Course Title : **Extension Activities**		
Course Code: **EAUG61**	Hours per week: --	Credits: 1
CIA : --	ESE : 100 Marks	Total : 100 Marks

Syllabus

UNIT-I: Community Development–I:

Definition – structure and composition – community based issues – need for awareness – Developmental Programmes.

UNIT – II: Community Development–II:

Rural Scenario – need of the Community – need for the community service – role of youth in community building – communal harmony – literacy – Educational Recreation.

UNIT – III: Volunteer Empowerment:

Women's Emancipation – formation of Youth Clubs – Self-Help Groups – Youth and Development.

UNIT – IV: Social Analysis:

Social issues – cultural invasion – media infiltration – human rights Education/Consumer Awareness – Adolescents Reproductive – HIV/AIDS/STD – Social harmony/National integration – Blood Donation.

UNIT – V: Introduction to NSS:

Basic Concepts – profile – aims – objectives – symbol – Motto – structure – Regular activities – Special Camping Programme – Adventure Programme – National Days and Celebrations.(Applicable to NSS Students)

(OR)

NCC - Origin – Organization – Ministry of Defense – Armed forces – commands – Defense establishments in Tamil Nadu Civil Defense – Aid to civil authorities – Disaster management – Leadership – Man management – Adventure activities – Social service

Reference

National Service Scheme Manual (Revised), Ministry of Human Resources Development, government of India.

PART – III **: Allied Theory**		SEMESTER **- III**
Course Title **: MATHEMATICS – I**		
Course Code: **05AT01**	Hours per week: 6	Credits: 4
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To enable the students to acquire the basic knowledge in application of mathematics in differentiation and integration.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the expression of trigonometric functions and its hyperbolic functions.	K_1, K_2
CO 2	acquire knowledge in solving problems in differential equations up to second order.	K_2, K_3
CO 3	acquire knowledge in solving problems in integral equations up to triple integral.	K_2, K_3
CO 4	understand the concepts involved in vector operators and its related problems.	K_2
CO 5	acquire knowledge in vector integration on basic theorems and its related problems.	K_2, K_3

K1-Remebering   K₂-Understanding   K₃-Applying

Syllabus

UNIT-I	**Trigonometry** Expression for sin nθ, cos nθ & tan nθ - Expression for $\sin^n θ$ and $\cos^n θ$ - Expansion of Sinθ, Cosθ and Tanθ in powers of θ - Hyperbolic functions and inverse hyperbolic functions.	**(18 Hrs)**
UNIT-II	**Differential Calculus** Differentiation Methods - successive differentiation (up to second order derivative only, omit Leibritz theorem)	**(18 Hrs)**
UNIT- III	**Integral calculus** Properties of definite integrals – Reduction formula for $\int \sin^n x dx$, $\int \cos^n x dx$ and $\int \sin^m x \cos^n x dx$ only - Double and triple integrals (simple problems).	**(18 Hrs)**
UNIT- IV	**Vector Differentiation** Differentiation of vectors - Gradient of a vector -Directional derivative and its maximum value – Divergence and curl of a vector – solenoidal and irrotational vectors (Simple problems only).	**(18 Hrs)**
UNIT- V	**Vector Integration** Line and Surface Integrals **-** Green's theorem, Stoke's theorem and Gauss Divergence theorem (Statements only - without proof) - Verifications (simple problems).	**(18 Hrs)**

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

PART – III **: Allied Theory**		SEMESTER **- IV**
Course Title **: MATHEMATICS – II**		
Course Code:**05AT02**	Hours per week: 3	Credits: 3
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble

To enable the students to acquire the basic knowledge in solving differential equations and its applications.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the formation of differential equations and its different forms.	K_1, K_2
CO 2	acquire knowledge in solving problems in differential equations of first order.	K_2, K_3
CO 3	acquire knowledge in solving problems in differential equations of higher order.	K_2, K_3
CO 4	understand the concepts involved in differential equations of homogeneous forms.	K_2, K_3
CO 5	acquire knowledge in solving problems in simultaneous differential equations and total differential equations.	K_2, K_3

K1-Remebering **K₂-Understanding** **K₃-Applying**

Syllabus

UNIT-I	Formation of differential equation – Differential equation of first order and first Degree – variables separable, Homogeneous equations - Nonhomogeneous equations of first degree.	**(9 Hrs)**
UNIT-II	Exact differential equations – Integrating Factors – Methods of finding Integrating Factors (Theorems without proof) - Linear equations – Bernouilli's equations.	**(9 Hrs)**
UNIT- III	Linear equations of higher order - Second order differential equation with constant coefficients – Methods of finding complementary function - Methods of finding particular integrals for the type e^{ax}, cos ax, sin ax, x^m, $e^{ax}V$.	**(9 Hrs)**
UNIT- IV	Homogenous linear equation with variable coefficients – Method of Solving a linear equation with variable coefficients by variation of parameters.	**(9 Hrs)**
UNIT- V	Simultaneous linear differential equations – Total differential equations.	**(9Hrs)**

DEPARTMENT OF MATHEMATICS
Programme: B.Sc. MATHEMATICS (Under CBCS and OBE)
(For those students admitted during the Academic Year 2018-19 and after)

PART – III : **Allied Theory**		SEMESTER - **IV**
Course Title : **MATHEMATICS – III**		
Course Code: **05AT03**	Hours per week: 3	Credits: 3
CIA: 25 Marks	ESE: 75 Marks	Total: 100 Marks

Preamble
To enable the students to acquire the basic knowledge in partial differentiation and its applications.

Course Outcomes (CO)
On the successful completion of the course, students will be able to

No.	Course Outcome	Knowledge Level (according to Bloom's Taxonomy)
CO 1	understand the partial differential equations and solving its first order problems.	K_1, K_2
CO 2	acquire knowledge in solving problems in different types of partial differential equations.	K_2, K_3
CO 3	acquire knowledge in Laplace transforms and its applications.	K_2, K_3
CO 4	acquire knowledge in Inverse Laplace transforms and its applications.	K_2, K_3
CO 5	acquire knowledge in Fourier series, Odd and Even functions and its related problems.	K_2, K_3

K1-Remebering　　　　**K₂-Understanding**　　　　**K₃-Applying**

Syllabus

UNIT-I	Partial differential equations –formation– by elimination of arbitrary constants and arbitrary functions – first order partial differential equations – classification of integrals – solving first order p.d.e in Lagrange's form.	**(9 Hrs)**
UNIT-II	Solving p.d.e of some standard forms – Type I: $f(p, q) = 0$ – Type II: $z = px + qy + f(p, q)$ – Type III: $f(z, p, q) = 0$ - Type IV: $f_1(x, p) = f_2(y, q)$.	**(9 Hrs)**
UNIT- III	Laplace Transform: definition – Laplace transforms of $x^n, e^{ax}, \cos ax, \sin ax, \cosh ax \sinh ax$ finding Laplace transforms of $f'(x), f(ax), xf(x)$ and $\frac{f(x)}{x}$	**(9 Hrs)**
UNIT- IV	Inverse Laplace Transforms – solution of differential equations using Laplace Transform- linear equations with constant coefficients and variable coefficients – simultaneous equations.	**(9 Hrs)**
UNIT- V	Fourier series – Fourier series for odd and even functions - half range Fourier cosine and sine series – Fourier series in a general interval.	**(9 Hrs)**

Text Books
1. Differential Equations and applications by Dr.S. Arumugam & Issac Publisher: New Gamma Publishing House, Palayamkottai (Reprint 2011).

VIVEKANANDA COLLEGE, TIRUVEDAKAM WEST-625 234

2. Ancillary Mathematics (Paper III-MKU) by Dr.S. Arumugam & Issac. Publisher: New Gamma Publishing House, Palayamkottai (2004 Edition).

Unit	Text Books	Chapters
1		Chapter 4 (Section: 4.1-4.3)
2	1	Chapter 4 (Section: 4.4)
3		Chapter 3 (Section: 3.1)
4		Chapter 3 (Section: 3.2)
5	2	Chapter 9

Reference Book

Ancillary Mathematics by T.K Manikavasagam Pillay & Others Viswanathan printers and publishers) Pvt. Ltd. Chennai.

Mapping of CO with PO

CO – PO Mapping for Course Code: 05AT03

05AT03	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	9	-	-	-	-	-	3
CO2	9	-	-	-	-	-	3
CO3	9	-	-	-	-	-	3
CO4	9	-	-	-	-	-	3
CO5	9	-	-	-	-	-	3
Weightage of the course	45	-	-	-	-	-	15
Weighted percentage of Course contribution to POs	3	0	0	0	0	0	2

Mapping of CO with PSO

CO – PSO Mapping for Course Code: 05AT03

05AT03	PSO1	PSO2	PSO3	PSO4	PSO5
CO1	3	9	9	3	3
CO2	3	9	9	3	3
CO3	3	9	9	3	3
CO4	3	9	9	3	3
CO5	3	9	9	3	3
Weightage of the course	15	45	45	15	15
Weighted percentage of Course contribution to POs	2	5	5	3	2
